Course Description:

Contractual Aspects of Value Engineering provides students with an intensive review of the techniques and objectives of the Department of Defense (DoD) Value Engineering program. Value Engineering is a systematic effort directed at analyzing the functional requirements of a system, equipment, facility, procedure, service, or supply item to achieve essential functions at the lowest overall cost. DoD contracting personnel and others involved in VE are exposed to basic concepts and definitions, Value Engineering Change Proposal (VECP) preparation and evaluation processes, VE contract clauses, types of savings, techniques for calculating savings, and the relationship of VE to other incentives contained in the contract and subcontracts.

Target Audience:

Contracting, program management and functional personnel who may become involved in Value Engineering (VE) applications or who support major weapon systems and can be expected to encounter specific VE activity. Individuals not assigned to contracting but working with VE such as engineers, program managers, and financial managers may be required by their agency directives to attend this course. While the primary focus is on contractual aspects of VE, the IPT/IPPD approach is emphasized regarding the utility of value methodology and resulting value engineering change proposals.

Department of Defense (DoD) Personnel:

Funding for travel and per diem is provided through the Defense Acquisition University program. It is recommended that Government personnel prepare and submit a DD form 1556 to the appropriate Defense Acquisition Career Manager (DACM) NO LATER THAN 60 DAYS prior to class start date.

Contractor and Non-DoD Personnel:

Contractor personnel may attend, tuition free, on a Space Available Basis. Please contact the following individual at Defense Acquisition University for further information.

Ms Kelly Long
Comm 703-845-6794
E-mail longko@acq.osd.mil

On-site Offerings for DoD Personnel:

If you have a large number of personnel desiring to take the CAVE (CON 236) course, talk with your DACM (DACM numbers/POCs are in the DAU catalog) concerning the possibility of obtaining an on-site offering. DACMs/POCs only, may contact the DAU focal point noted below:

Ms Sheryl Guardiani
DSN 761-6829, x 6779
Comm 703-845-6779
E-mail guardis@acq.osd.mil

On-site Offerings for Contractor Personnel or for Further Information:

Please contact me!!!
